

# AAA METAL FABRICATION

Winery Tanks & Equipment, Custom Stainless Steel Fabrication

We operate a shop small enough to offer personal attention, large enough to tackle complex projects. All of our shop floor employees are master welders, trained to do perfect work. We make things that work well and wear well. We take pride in making things that look good too. We think you will appreciate some of the finer points of our craft:

- Clean, smooth, minimal welds augment cleaning, promote sanitation
- Acid cleaning matches welds to the virgin stainless steel better than grinding
- Continuous welds on cladding seals in insulation; keeps it working, keeps it sanitary
- Thermowell gussets prevent punch-down damage
- Rugged tank bottom support prevents bulging bottoms, puddling and “oil canning”
- Reinforced forklift pockets are rugged and sized to accomodate pallet jacks
- Stainless steel tank stands never need maintenance and will never corrode.

From bin to barrel, AAA Metal Fabrication strives to improve the process of making wine. With innovations such as our manway racking arms, natural cap management systems, and Vin-Evac™ tank bottoms, we strive to advance the state-of-the-art in the wine making industry.

We have integrated the comments of a hundred winemakers into the design of our tanks and equipment. This brain trust continues to guide our design and help us grow with the industry. We aim to make the job of premier winemaking easier and our tanks and equipment less prone to damage.

**Ronald Krol** is the General Manager of AAA Metal Fabrication and the principle designer of everything we manufacture. Krol has pursued metal working in the food processing industry for over 35 years. Coming to this industry as an accomplished welder and sculptor, Krol has an eye for clean lines, graceful curves and intelligent innovations. Involved in winemaking as the co-owner of a vineyard, Krol understands first hand some of the issues facing winemakers. Many of our clients depend upon Krol's independent thinking and problem solving abilities.

We look forward to adding you to our list of esteemed customers.
